Invitation

We invite all of the scientists, students, researchers, delegates all over the world to attend the International Forum on Virology and Rare Diseases held on June 24-25 2021 at Berlin, Germany. The meeting goal is to know all about the disease status in all over the world and to know about what the fundamental practices will be there to applicable in the disease and the main thing is to discussions about the disease and focusing attention how to eradicate the disease in the primary stage level. Hope you will be a part of our conference and share your research ideas at a beautiful location, rich with people and knowledge.

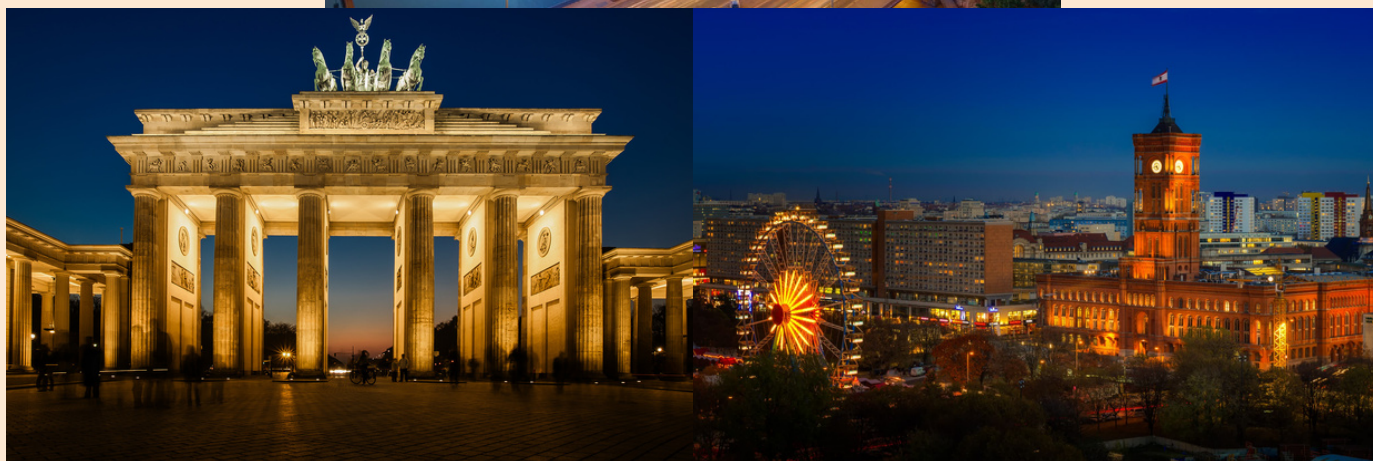

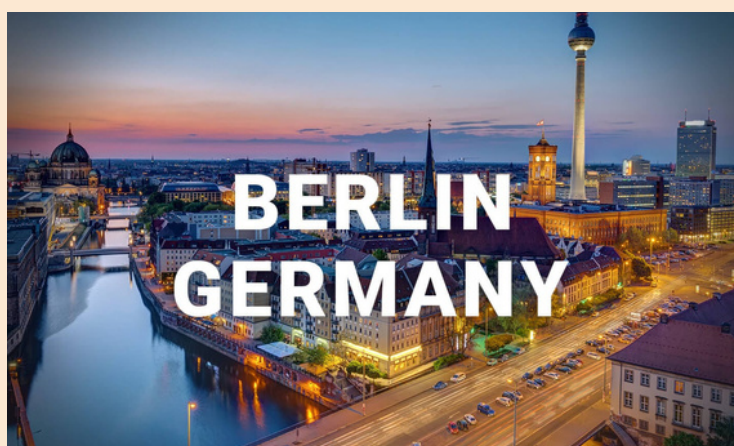

Conference Sessions

1. General virology and their transmission
2. Modes of transmission of different viruses
3. Diagnosis and treatment of different viral infections
4. Viral pathogenesis
5. Molecular virology
6. Veterinary virology
7. Host cell response to viral infection
8. Plant virology
9. Advances in antimicrobial vaccines
10. Infectious diseases
11. Viral isolation
12. Respiratory viral infection
13. STD's
14. Vector bone viral infection
15. Viral infection during pregnancy
16. Emerging viruses
17. Global spread of viruses
18. Deadliest viruses
19. Infection and immune system
20. Neuro virology
21. Epidemiology of virus

Venue: Berlin

Berlin is the capital and largest city of Germany by both area and population. Berlin straddles the banks of the River spree, which flows into the River Havel in the western borough of Spandau. Among the city main topographical features are the many lakes in western and southeastern boroughs formed by the spree, Havel, and Dahme Rivers. Berlin is influenced by a temperate seasonal climate. About one-third of the city's area composed of gardens, parks, forests. Berlin's most famous historic landmark is the Brandenburg Gate once a symbol of a divided nation and now a symbol of unity and peace. Berlin climate can be best described as a humid continental climate.
